

ACA Semester Project on

Overview of Cyber Security

Mentor - Nikhil Vanjani

Submitted by - Vibhor Porwal

Introduction

This was my ACA project in second semester, the aim for this project was to get a good insight into the various Internet Technologies. I learnt about Computer Networks, basics of web security, what makes a secure application and about various attacks that are commonly used by attackers to break into systems.

What I learnt

1. I did a NPTEL Course(first 20 lectures) on Internet Technologies.Learnt about Computer Networks,basics of Cryptography.
 2. Learnt PHP and MYSQL.
 3. Made an application using PHP and MYSQL. It was basically a Content Management System.
 4. Done SQL Injection and Blind SQL Injection attack on DVWA.
 5. Learnt about OWASP Top 10 attacks.
